

Discrete Mathematics

Volume 306, Issue 6, 6 April 2006

Contents

Contributions

- C. Balbuena, E. Barker, K.C. Das, Y. Lin, M. Miller, J. Ryan, Slamin, K. Sugeng and M. Tkac*
On the degrees of a strongly vertex-magic graph 539
- E.S. Egge*
Restricted signed permutations counted by the Schröder numbers 552
- T. Mansour, S.H.F. Yan and L.L.M. Yang*
Counting occurrences of 231 in an involution 564
- M. Montassier, A. Raspaud and W. Wang*
Bordeaux 3-color conjecture and 3-choosability 573
- S.J. Seo and P.J. Slater*
Competition-reachability of a graph 580

Communications

- A.A. Dobrynin and L.S. Mel'nikov*
Counterexamples to Grötzsch–Sachs–Koester's conjecture 591

Notes

- F. Bonomo*
Self-clique Helly circular-arc graphs 595
- T. Britz*
On P -weight and P -distance inequalities 598
- M.J. Grannell, T.S. Griggs, M. Knor and J. Širáň*
Triangulations of orientable surfaces by complete tripartite graphs 600
- K. Kimura*
Factors and vertex-deleted subgraphs 607
- V. Nikiforov*
The smallest eigenvalue of K_r -free graphs 612
